Patent Details:

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
DE 29619294	U1		6		

Abstract (Basic): DE 29619294 U.

The inside or outside of the sleeve enclosing the heart has expansion chambers (2,3) which are connected to a system (4) facilitating expansion and contraction.

During expansion, the expansion chambers may exert pressure from outside onto the heart chambers. The sleeve can be partially inserted. The chambers may be sealed with the technically renowned System-4 to enable expansion and contraction.

ADVANTAGE - The sleeve is made to measure for each heart, and helps a diseased heart to function so that the patient can lead a normal life.
